

Contemporary Workspace

This contemporary office space was a unique commercial space. This is a house that the owner converted into office space in which to run his business. Because this space houses landscape designers it had to be fun and relaxed, yet function as a serious place of business. The project consisted of offices for 4 people as well as a Meeting Room. We used a wasabi green accent wall in the Main Office area as a nod to the outdoor-focused business and a unique wall mural in the Meeting Room, which was a total surprise for the business owner. The furnishings were chosen for their clean lines and some unique touches were used as accents. This office space is the ideal mix of cool, relaxed and perfectly functional.
