

Urban Loft

My client purchased this downtown loft and was starting from scratch. He was fortunate enough that the space had hardwood floors, large, wooden beams and exposed brick walls. He selected paint colours and was in need of space planning and furniture. In keeping with the industrial feeling, we decided on a modern furniture approach. The client's high-end taste and need for comfort was the inspiration. We chose a long, low sectional and the ultimate Eames lounge chair. The Saarinen table and chairs in white, in the dining area, are the perfect choice for my busy client. This is a unique space and the furniture choices were chosen to complement the remarkable architecture.
