

Comfortable Condo

My clients were looking for an update to their main floor condo. They have traditional taste and wanted new furniture for their Living Room. We ordered a sectional sofa and 2 beautiful reclining chairs to maximize seating. In order to accommodate the tastes of both clients, we used a bold red and gold fabric to add a lot of excitement to the other neutral furniture. The fabric was used on a window valance, accent pillows, and a storage ottoman, which ended up being a real focal point. They liked the colour of the fabric so much that they commissioned a bar-height dining table in the same bright vermilion colour. Incorporating the client's own artwork and accessories is always a decorating success for me!
