

# Desoto Gardens Model Home!

This project was truly a dream come true for me. I was able to choose the finishes and furnishings for the entire 2580 square foot home. I worked with Duca Homes and was very pleased to have a spacious and well planned layout to work with. The feature of this home was the tile used throughout, which made a huge statement as soon as you walked in the door. The all white kitchen was showcased with a stunning herringbone patterned backsplash and luxurious granite countertops. We used yellow as an accent colour throughout the main floor, to brighten up the moody grey palette. The navy blue Powder Room and Master Bedroom were unexpected, delightful surprises. The finishes in the Master Ensuite and Main Bathroom were practical and affordable, while being modern and stylish. I was very happy with the result!
