

Luxurious Family Home

My clients asked me to help them add the personality and fun into their already beautifully appointed home. This young family had lived in their home for a number of years and recently had a wood burning fireplace and high-end tumbled travertine floors installed before I got there. I used one of their large paintings as inspiration for the colours and added custom furniture and window coverings to the rooms on the main floor. The home underwent a stunning transformation including the addition of a bistro-style backsplash and lovely light fixtures. My clients wanted a home that was comfortable enough to live in everyday, as well as a home they were proud of entertain their family and friends in.
