

Modern Townhouse

I was very happy to work with this client in her spacious and beautifully finished town house. She made changes from the front door right through to the back deck. I started with painting over the "builder beige" wall colours and changed the light fixtures to add some glamour and drama to her one floor home. I used the client's artwork in most of the spaces but added some new area rugs and accessories. The show stopping feature is definitely the rich grass cloth wallpaper we installed in the entire front hallway. The texture warms up the functional space and welcomes you through the front door. The kitchen back splash is bold and the custom chimney hood fan was a fun challenge to take on!!
